

## Servers and Statements

**Volume 6 No. 1**

The time has come to increase productivity. HDSI has two more ways to save you money and increase output without increasing staff. Through the use of new technology, HDSI gives our customers the opportunity to greatly enhance productivity.

### Latest Technology from HP

Some of our customers have servers in use that were purchased anywhere from five to ten years ago. While this is a testament to the quality of the hardware, it is still technology that is five to ten years old. The new HP LINUX servers from HDSI offer an affordable upgrade to your current computing environment with tremendously increased processing speed. *Processing time for items that would have taken minutes now takes seconds!*

Additional features include the redundancy of data and different server designs to make the most of your available office space. The data redundancy, called RAID 1, enables data to be stored across two hard drives making the loss of a drive unnoticeable to users. In most cases hard drives can be replaced while the machine is still running! A variety of server designs allows you to purchase a standard floor standing model or a server that can be mounted in a rack along side other computer hardware. Both designs offer the same great functionality and value. Increase your company's productivity. Call HDSI today at (847) 398-0000.

### Pressure Seal Forms and Auto Sealers

Health Data Systems has a way for our customers to reduce their costs associated with printing and mailing patient statements, checks, 1099's and W2's. The form, called a pressure sensitive form, is an all-in-one solution where the form is the envelope. After printing, the form is fed into a auto sealer machine that not only folds the form, but seals it for

mailing. There are no envelopes and therefore no stuffing of envelopes.

The savings derived from not having to purchase envelopes and from reduced man hours can be significant. Some cost comparisons have generated a savings in excess of \$10,000 over a five year period.

Maximize your company's productivity. Call HDSI today at (847) 398-0000 and see what benefits can be found today by taking advantage of tomorrow's technology.
