

## Job Accounting Provides Peace of Mind

**S**ecurity. It's a word that has become the leading subject of the IT industry. We know HDSI provides the means to secure data via logins, passwords, and back-ups. What you may not know is that HDSI has an application to provide real-time and historical data on users entering or using the computer.

Inside the Job Accounting Module are several applications to meet your needs.

- **Summary Time Report** — Review of usage for a single day, a range of dates, or a month. Lists by user, the modules accessed, time in each module, as well as totals for all users.
- **Detailed Time Report** — Records in date sequence by user, all activity performed on a single day, a range of dates, or a month.. The report displays what date and time an individual signs on, what programs are run, as well as when and if a user signs off. The time in each program is calculated, in addition to the total length of the session. The terminal ID is listed next to each users name.
- **Current Terminal Status** — At any point in your day, a listing of those currently using the system can be shown on your monitor detailing what user is at what workstation, the facility their logged onto, what program their accessing, and the start and stop time of each session.
- **Monthly Cleanup** — Maintenance program that will remove any older summary information.
- **Monitor Terminal Activity** — The ability to monitor activity of a current user while they are running various applications. This option can also be run remotely, to assist a user running most applications.

## Peace of Mind Realized

A very cost effective way to achieve peace of mind and add a level security, is through the use of HDSI's Job Accounting applications. With the variety of methods to view user activities, from printed summaries to viewing activity at a glance, there is no reason not to provide *yourself* that extra level of security. Contact HDSI today, at (847)398-0000, and see what benefits can be found today by taking advantage of tomorrow's technology.
